Great Sleep Awaits
A letter from our CEO

We are committed to helping people open their eyes to the power of sleep.

At Reverie®, we come to work each day with the singular goal of helping people live healthier, happier lives through better sleep. That is no small task in an always-connected world that prioritizes almost everything over sleep. But more energy, less pain, weight loss and less crankiness really are the side effects of consistent, restorative sleep.

Great sleep starts with the willingness to work on getting better sleep. Next come the tools to make that happen. A Reverie sleep system is designed to give you completely customized comfort that suits you today, and can adapt with you over time as your needs change. We take great pride in developing sleep technology products that deliver incredible comfort to you as the result of world class research and development and quality manufacturing.

So whether or not you end up buying a Reverie, we hope your current shopping journey ends with the power of better sleep.

Martin Raia-Meehan
CEO, Reverie
The bed of the future is here.

A Reverie® bed is more than just a mattress. It’s an entire system, customized to your specific needs for comfort. Drawing on the best ideas in design and technology (both outside our industry and within), we came up with a bed that is unlike any other. Major components include our patented DreamCell® mattress, with firmness that can be adjusted to fit the differing needs of both people who share it. And underneath that mattress is an adjustable power base that moves to support various positions for sleeping, reading, sore backs, alleviating snoring and more. Ready for all the details on how you can start sleeping your best?

Anatomy of a sleep system.

C. Comfort layer. We offer two very different feels. A velvety memory foam hybrid with a layer of breathable latex floating on top. Or choose plush all-natural latex. More on page 8.

D. Breathable mattress cover. Finished with Feran Ice® to wick away moisture. Cover can be unzipped to rearrange foam springs and also removed for cleaning.*

E. Our split adjustable bases allow separate movement on each side of the bed simultaneously.

Have a bed frame you already love? Our beds fit within most frames and can attach to most headboards. Call us for specs and to ask about attachment hardware.

*Features vary by model
Our patented DreamCell® mattress.
We thought of everything.

Our strong belief is that comfort is never one-size-fits-all. Great sleep starts with a mattress that fits your unique body. In order to give you that kind of comfort, we totally reinvented the mattress. Our revolutionary DreamCell mattress design uses individual foam springs in densities from extra soft to firm to bring your spine into alignment. After consulting with you, we arrange our foam springs in a specific pattern to create maximum comfort for you and your partner.

Differences you can sleep on:

Customization for both partners. You like a soft mattress, but your partner prefers firm? No worries, we can customize both sides of the mattress when we build it.

Micro-targeted support. In our Dream Supreme™ mattresses, there are over 200 foam springs in different densities, allowing custom firmness according to your body type in increments of four inches.

Changeable firmness. Your mattress is built to meet your current needs. But life is unpredictable. So we’ve constructed our mattress with changeable firmness.* Become pregnant or hurt your back? Simply unzip the mattress and change the firmness by rearranging the foam springs.

What are these fun little things?

These cells are the support system in our mattress. And they’re the key to everything. Four different firmness levels, each a different color. Over 200 of them inside the mattress. All the cells you need to achieve any firmness level you want. And each one is movable.* We arrange these little DreamCell foam springs into scientifically developed patterns to achieve the perfect firmness level, person by person.

What else is worth knowing?

**Increased airflow.** Our foam springs are designed with little holes in the middle for better circulation. Air moves through and around them to help keep you cool.

**Temperature control.** Our mattress covers are finished with Feran Ice® technology for improved moisture wicking. And our Dream Supreme™ II comfort layer is graphite infused to whisk away heat and add a plush feel.

**Limited or no motion transfer.** With our individual spring design, your partner can get out of bed or roll over without your feeling it much or at all.

**Cashmere quilting.** For luxurious, natural comfort.

**Conforms better to a power base.** Our mattresses are not stiff like spring and coil mattresses, nor are they a solid piece of foam. The individual springs flex and conform to all movements of our power bases.

**Quality, hypoallergenic materials.** The natural latex springs and comfort layer in our Dream Supreme line are OEKO-TEX® certified. Our memory foam and RevTech™ foam are CertiPUR-US® certified.

**Durability.** Our mattresses exceed the industry’s Intertek durability standard.

**Consumer Reports.** See what they had to say about our mattress [here](#).

*Features vary by model.
Feel something.

How a mattress feels is totally important. But for each person, it’s also completely subjective as to what is most comfortable. So besides choosing your preferred firmness, Reverie offers you two completely different experiences when you climb into your bed at night.

Luxe, velvety memory foam hybrid

Here’s the thing about memory foam. For many people, it feels great. With one exception. Until now, it’s slept hot. We came up with a hybrid version that puts a layer of breathable natural latex on top, followed by an amazing memory foam layer for comfort, then DreamCell® springs underneath to let excess heat escape. Sink into that luxurious feel and enjoy it, no sweat.

Light, buoyant natural latex

We’ve made the best natural latex mattresses for a while now. The feel is airy and responsive. You rest (or should we say float?) on top, gently supported by an natural latex comfort layer and our DreamCell springs underneath. Added bonus: latex naturally repels heat, dust mites and bacteria. Ready to sleep on Cloud Nine?

Not sure what you want? No worries, our trained Sleep Specialists can help you decide. Call 888-888-5990 today for a free consult.
Introducing our new DreamTop™ mattress. You both get your own way.

We know opposites attract, which can be problematic when sharing a bed. Our new DreamTop mattress is the perfect enabler for that kind of independence. It’s partially split at the head of the mattress to work perfectly with a split adjustable base. With independent movement on each side, one of you can read upright while the other sleeps flat. Or enjoy a massage on your side while your partner reads. So cuddle when you feel like it. Go to your own zones when you want. Win-Win. (And yes, we do have sheets for this mattress.) If you prefer to have your own distinct territory, you might like our standard split king size, which is essentially two XL twin mattresses on a split adjustable base.
Our adjustable power bases.
The world of sleep is no longer flat.

Your bedroom is your oasis. Whether you’re sleeping, reading, working or something else, finding the perfect position is the key to comfort. Flat alone just won’t cut it. Our power bases offer an infinite number of positions. Here are a few popular ones:

- **Anti-Snore position.** Elevating the head a smidge opens the airways, which can help alleviate snoring. People with colds, allergies or acid reflux may also benefit from this position.

- **Zero Gravity position.** Simulates weightlessness, taking the pressure off your lower lumbar region. Great for fitness fanatics and people with back pain, but overall people really do love it.

- **Reading position.** Propping yourself up with pillows never seems to work for very long. With our power base, you have stable back and neck support. Some people like to raise the foot a bit for support under their knees.

- **Feet Up position.** Improves circulation and reduces swelling. Can be helpful for pregnant women, people with injuries or certain illnesses like diabetes.

Rest assured.

Adjustable power bases are high tech equipment, so you want a company with some serious cred. We’re one of the world’s largest manufacturers of adjustable power bases, having designed, engineered and sold nearly 2 million bases in the last decade. Not surprisingly, we back our bases with a strong 20-year limited warranty.
Little luxuries you’ll soon view as necessities.

If you’ve never thought about an adjustable power base before, you’ll soon wonder why. They make sleep, evenings and just hanging out during the day so much more enjoyable. Life is short. Don’t you deserve this?

**New advanced lumbar support.** We did a technology deep dive, and in the process, completely redefined the idea of lumbar support on our 9T™ base. This lumbar is adjustable by degree and aligns perfectly with your spine.

**LED nightlight.** A gentle LED nightlight under the bed allows you to get up early or make a midnight fridge run without disturbing your partner. Some find the quality of the LED light soothing.

**Surround Sound.** Add a special sound system that we developed to push maximum acoustics up and around your bed. The speakers attach to the bed legs, and the subwoofer fits under the bed. A premium listening experience for movies, gaming, music or white noise.

**Try our 3D-Wave™ Massage.**

Unlike other furniture massage technology, which merely shakes the bed, Reverie’s patented 3D-Wave technology creates a quiet, soothing, three-dimensional motion that increases blood circulation. A recent university study showed using 3D-Wave massage at bedtime helped people wake up happier and feel more alert all day. Read more on our blog.

Pillows, linens and accessories.

Customizable pillows
Our innovative line of quality pillows offers adjustable heights, certified hypoallergenic materials and removable, moisture-wicking covers. Visit Reverie.com to learn more.

Handmade headboard
Carefully tufted and upholstered in your choice of dark or light grey to match your power adjustable base. Queen and King sizes only. Visit Reverie.com to learn more.

High tech linens and mattress pads
Our sheets have various properties, depending on your needs. There’s our organic line. High performance sheets designed to sleep cool. Special fitted sheets that grip when an adjustable bed moves. Fitted sheets for our new DreamTop™ mattress. And organic mattress pads, too. Visit Reverie.com to learn more.

Surround sound designed for your bed
Speakers that we specifically engineered to attach to your bed legs and push sound up and around your bed. Provides a premium experience for watching TV, listening to music, or gaming. Includes four speakers and a subwoofer. Visit Reverie.com to learn more.
The Reverie 365 Promise

If you’re just looking for a bed, we’re probably not for you. You came to us for something much more valuable … to improve your health and your life with more and better sleep.

Here’s our commitment to you.* We have designed the most customizable bed on the market. Over the next year, we’ll pull out all the stops to ensure your comfort. Our exclusive program includes:

**Sleep Concierge**
Your mattress comes in a firmness configuration based on a consult we do with you when you order. Once it arrives, occasionally it’s not exactly right for you, but the great thing is that the design allows the firmness to be adjusted every 4”. We’ll work with you via phone or email to customize your bed until it’s perfect for you and your partner.

**Free White Glove Delivery**
Within the 48 contiguous United States when you purchase directly from Reverie. Outside that region, extra charges apply.

**Strong Warranties**
Our mattresses are warrantied from defects for 10 years. Our power beds have a limited warranty for 20 years. See Reverie.com for details.

Due to the extensive commitment behind this promise, as well as the extreme customizability of our beds, we believe you won’t need to return your bed. But if you prefer to keep your options open, we do offer a Return Option for a fee.

Other companies take returns, but … not really. They mostly offer exchange. And that’s inherently inconvenient. Time spent scheduling and being available for a pickup. Empty space and maybe even no mattress while you look for a new bed, sigh. It’s all wholly unnecessary with our bed, because we can tailor it to perfection for you. So we decided to avoid the hassle and just work with you to make it right. We view great sleep as a journey that we take together, and we look forward to getting started.

*Reverie 365 Promise only valid when you purchase the DSI or DSII sleep systems or mattresses direct from Reverie.
What customers are saying:

“The very first night, I noticed a huge change... I didn't set an alarm clock and hopped right out of bed at 7:30am, ready to go. My legs felt great!”

– Steven Oleksy, Professional Hockey Player

“The system perfectly supports me while sleeping. I have no pressure points while sleeping on the Reverie. The Reverie mattress is simply sublime …”

– Women's Choice Award Respondent #5

“I love getting into bed, turning on the massage and feeling my stress disappear. By the time it turns off, I’m almost always asleep.”

– Women's Choice Award Respondent #28
