Pairing a Remote to a Power Base
(Signal Frequency/Non-Bluetooth)

NOTE: The power base is paired to its remote upon delivery. If for some reason you should need to pair the two, follow these instructions.

Step 1
Place batteries into a remote control (3 x AAA batteries)

Step 2
Check that the power base is plugged into a functioning outlet.

Step 3
Press the learn button underneath the base (on the control box) for 3 seconds.

Step 4
When the button illuminates to green on the control box the radio frequency code setting function will be activated.

Step 5
Press any button on the remote control.

Step 6
When the receiver light flashes, you have completed the learning process of the radio frequency code.

NOTE: To join another power base to the same remote, repeat steps 1-6 with the other power base.
