1. Make sure the bed is in the fully flat position.
2. Insure the bed is not plugged into and electric outlet or power strip.
3. Turn the bed over on it side or on its back.
4. Locate the Power Supply/Control Box (figure 1)

![Figure 1: Power Supply/Control Box](image1)

![Figure 2: Fuse Holder on Power Supply/Control Box](image2)

5. Find the fuse holder and remove it with a flat tip screwdriver. (Figure 2)
6. Remove the Fuse.
7. Replace the fuse with a 1 AMP 250V Slow Blow Fuse.
8. Reverse to install.

**NOTE: DO NOT OVERTIGHTEN THE FUSE HOLDER**
